Subject: Lyondell Trust : Kalamazoo Site / OU1

Good morning.

Jay and I wanted to send a brief email thanking everyone for their time meeting with us last week to discuss the path forward strategy for OU1. The meeting was extremely productive and we look forward to working with all parties to see the site through remedy.

As indicated, the Trust will begin developing a strategy to answer some of the pre-design questions that were identified throughout the discussion. Working with EPA, we will remain in contact with the City and State and will share updates as progress is made.

In the interim - Paul - please feel free to reach out to Mike at Tetra Tech directly to discuss a sampling plan for the Panelyte property to be conducted this summer. We have brought him up to speed.

Two additional notes -

- 1) I have attached a 2016 survey of Trust property. While this does not identify the extents of the Panelyte property, it very clearly delineates the extent of Trust ownership, which at this point, should serve the same purpose. The Trust will prepare and distribute a version of this as an overlay on a current photo.
- 2) If someone can forward the Existing Conditions Evaluation of the Panelyte Site prepared for the City this year with all relevant attachments, we would appreciate it.

If anyone would like to discuss the path presented in this email, please feel free to call.

Thank you,

Andrew W. Steinberg
